

A close-up, low-angle shot of a sniper in a rain-soaked forest. The sniper is wearing a hooded raincoat and a cap, looking through the scope of a Bergara rifle. The rifle is covered in rain droplets. The background is a blurred forest with rain falling, creating a bokeh effect. The overall color palette is a warm, golden-yellow, suggesting a sunset or sunrise. The image has a cinematic, high-contrast quality.

# OUR BARRELS MAKE THE DIFFERENCE

## A HISTORY OF PRECISION

With the most technically-advanced barrel manufacturing techniques, state-of-the-art machinery, and an unwavering commitment to quality, Bergara Barrels has become the barrel source of numerous top-tier gun manufacturers in both Europe and the United States. Now, with Bergara Rifles we are producing a full line of precision rifles, engineered and built to showcase the performance capabilities of our world-class barrels.

At Bergara we believe that a precision rifle requires not only the best components, but also an assembly process that is carried out by individuals who are the best of the best at their craft. For this reason, we brought together a team of the world's most talented and experienced rifle builders – first in the USA for our Custom Series and Premier Series, and now in Spain for our B-14 Series.

It all began several years ago when we first began with a small line of custom rifles and one top-notch craftsman, the former Production Chief & Chief Instructor for the United States Marine Corps Precision Weapons Section. As Bergara rapidly grew, we then assembled a hand-picked group of his best PWS alumni, the guys who built the rifles used by US Marines both in combat and competition all over the world.

Today, these Marines still form the core of our production team, passing their knowledge and expertise on to every new employee, and thereby bringing their own real world experience and expertise to every Bergara rifle.

## EVERY RIFLE STARTS WITH A PRECISION BARREL

### STEP 1 - BARREL STRAIGHTENING

Each Bergara barrel must begin with a straight bar of cylindrical steel. We inspect every bar to ensure it meets a deviation of less than 4/1,000 (or .004) of an inch. Many barrel manufacturers never even evaluate this aspect of a barrel and consequently hinder the barrel's accuracy potential.

### STEP 2 - DEEP HOLE DRILLING

Once the steel bar is straightened, it moves on to a four spindle deep hole drilling machine where a specialized bit drills a perfect hole through the entire length of the bar.

### STEP 3 - BARREL HONING

Most other barrel manufacturers move from deep hole drilling to reaming, a process that leaves tool marks in the bore. Instead of reaming, Bergara uses three separate honing spindles that utilize diamond tipped bits that polish the interior surface of the barrel to a mirror-like finish that is almost completely free of tool marks. This time-consuming step lends Bergara a level of accuracy on par with barrels costing much more.

### STEP 4 - BUTTON RIFLING

A carbide rifling button is drawn through the barrel to produce the rifling grooves at the appropriate twist rate for each caliber. This produces a groove diameter deviation of less than 2/10,000 (or .0002") of an inch. It's the same result that many gunsmiths accomplish by hand lapping.

### STEP 5 - STRESS RELIEVING

Finally, a high temperature heating process realigns the steel molecules ensuring that the barrel is free from any stress after the button rifling process.

# PREMIER SERIES RIFLES

Think of our Premier Series as an extension of our Custom Series, but with standardized features for greater efficiencies in parts production and assembly – providing near custom performance at prices that are affordable to serious shooters.

Bergara's premium 416 stainless steel barrels receive a proprietary honing process at our barrel-making facility in Bergara, Spain. Then, at the Bergara USA factory, the barrel receives a Cerakote™ finish and is coupled with our proprietary Bergara PREMIER action, featuring a nonrotating gas shield, coned bolt nose, and sliding plate extractor.

Premier Series rifles are built by hand and offer each shooter a wide variety of stock options. Choose from multiple carbon fiber, fiberglass, composite and precision machined chassis stock offerings. All Premier Series rifles are built around legendary Bergara barrels and feature world-famous TriggerTech® triggers among other industry-best components. All rifles are hand assembled in house by our qualified builders to our exacting standards and precise specifications and are guaranteed to produce sub-MOA groups using factory ammunition.

## PREMIER SERIES RIFLES

### BERGARA PREMIER ACTION

- 416 Premium stainless steel with Cerakote™ finish
- 2 locking lugs located on the front of the bolt head
- Separate "floating" bolt head assures contact with lug abutments
- Cone-shaped bolt nose assures smooth feeding
- Sliding plate extractor
- Ejector is a spring loaded plunger located in the bolt face
- 1-piece stainless steel bolt body with threaded-in bolt handle
- 90° bolt throw angle
- Firing assembly is bayonet style allowing quick access to the firing pin assembly. Simply twist the bolt shroud and the entire firing assembly can be removed without tools

### BERGARA BARREL

- Made from 416 Premium stainless steel
- Cerakote™ finish
- Sub 1.0 MOA accuracy guaranteed
- All Premier Rifles are guaranteed to produce sub-MOA groups at 100 yards using quality factory ammunition

### TRIGGER

- All Premier rifles feature TriggerTech® triggers with Frictionless Release Technology™ as standard equipment

### SAFETY MECHANISMS

- The 2-position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position
- Non-rotating gas shield behind the bolt head protects the shooter from gas and debris in the event of a case or primer rupture

# B-14 SERIES RIFLES

Our B-14 Series brings Bergara quality and accuracy to a line of rifles that is affordable to almost any serious big-game hunter or shooter. Built in Spain at our state-of-the-art production facility, highly-efficient manufacturing and assembly techniques allow us to deliver a rifle with a level of quality and performance that is unmatched for the price.

B-14 Series rifles feature the world-famous Bergara barrel, which is complemented by our own super-smooth B-14 Action. This action features a coned bolt nose and breech ensuring smooth feeding and a sliding plate extractor for proper alignment.

The Bergara 4140CrMo steel barrel is finished in matte blue. Lengths and contours vary by model. Stocks are designed in various styles to ensure proper fit for every shooter.

The BMP Chassis rifle features a machined aluminum chassis stock that provides stability, adjustability, and versatility. The HMR features a built in Mini-Chassis that offers repeatable bedding and maximizes accuracy by supporting a fully floated Bergara barrel.

The Timber and Woodsman models feature Monte Carlo or American Classic styling, both in hand-graded oil-finished walnut. The Hunter and Ridge models sport a lightweight synthetic stock designed to withstand the elements. Both the wood and synthetic stocks are bedded with integral pillars for stability and enhanced accuracy. All B-14 rifles are guaranteed to produce 100 yard groups of 1.0 MOA or better with quality factory ammunition.

# BERGARA ACADEMY

Several years ago, our company was able to acquire an incredible piece of property in Belt, Montana with 22,000 private acres. Located just outside of Great Falls, we've been able to put our rifles, as well as, ourselves through all the rigors that the Big Sky Country affords. We are now inviting select groups to share in our little piece of paradise. We are calling it "The Bergara Academy."

Here, in a high-altitude shooting environment unlike any other, we'll put you through intense training sessions that will elevate your long-range shooting skills.

All courses and events are taught by professional instructors, with detailed and hands-on instructional applications specifically tailored to the desires of the group. You'll train on a number of world-class ranges with animal silhouette targets woven into the natural environment at ranges over 1,200 yards.

Packages can also be further customized to include any number of other exciting activities, including prairie dog shoots on private grounds, world-class trout fishing, and more.
